

Environmental Structures

Environmental structures include tanks and buildings to support potable water, pollution abatement, industrial waste, and wastewater facilities. The following project list illustrates the variety of structural design experience available at CSD.

<p><u>Lake View Lift Station</u></p> <p>Project Type: Environmental Structures</p> <p>Location: Pleasant Prairie, Wisconsin</p> <p>Description: Sewage lift station with deep multicell rectangular pit.</p>	<p><u>Sussex Wastewater Treatment</u></p> <p>Project Type: Environmental Structures</p> <p>Location: Sussex, Michigan</p> <p>Description: Tank designs including oxidation, sludge storage, clarifiers and lift station plus ancillary buildings.</p>	<p><u>Brookfield Wastewater Treatment</u></p> <p>Project Type: Environmental Structures</p> <p>Location: Brookfield, Wisconsin</p> <p>Description: New wetwell, influent pump station, preliminary treatment, grit, and sludge storage facilities.</p>
<p><u>Hartford Wastewater Treatment</u></p> <p>Project Type: Environmental Structures</p> <p>Location: Hartford, Wisconsin</p> <p>Description: New aeration basin, clarifiers, filter building, sludge storage and processing facilities.</p>	<p><u>Lannon Lift Station</u></p> <p>Project Type: Environmental Structures</p> <p>Location: Lannon, Wisconsin</p> <p>Description: Wet well for underground pump station.</p>	<p><u>Whitman Place Well No. 1</u></p> <p>Project Type: Environmental Structures</p> <p>Location: Mequon, Wisconsin</p> <p>Description: Potable water pump station and reservoir.</p>
